Dear Megan and Raymond,

It is our pleasure to inform you that your position paper "A Web-based Human Computer Interaction Audit Tool To Encourage Collaborative Cognitive Ergonomics Within Interaction Design" has been accepted with some suggestions to the ECCE 2016 workshop "the Role of Cognitive Ergonomics in Interaction Design - Addressing Advances in HCI".

You are kindly invited to sharpen the opportunities to discuss the position statement that you make with respect to the topic of the workshop and focus less on reporting your research.

A more detailed formal review and further submission information will be sent to you next Monday, July 4. In this way we are well in time for the early registration deadline of July 6. Note that at least one of the authors has to register to ECCE 2016 before August 1.

With kind regards,

Anke Dittmar and Geert de Haan,
Workshop Organizers
